

TaxiTimes Installation Instructions

MS Windows

1. Extract the TaxiTimes Program.zip file into a folder
2. Install EasyPHP Devserver onto your machine (This is available [here](#))
3. Start EasyPHP by right clicking the E icon in the toolbar tray and clicking start.
4. Right click on the E again, then click on administration, and open PHPMyAdmin.
5. In PHPMyAdmin, create a new database called '**taxidb**'.
6. Then click on the 'Import' section.
7. Under 'File to Import', select the taxidb.sql file and press 'Go'
8. Now you should have the database installed.
9. Navigate to where EasyPHP was installed, and then into the www folder.
10. Extract the contents of 'Web Files.zip' into the www folder.
11. In your browser, go to 127.0.0.1/live.
12. You should see the taxitimes login screen!

Accounts

There are two accounts in the system right now

Username	Password
admin	COOL_MAN
kstrmtr	lecturA

'admin' is an administrator account, while kstrmtr is a lecturer account with 2 courses and some classes
